Catalogue, March 2004

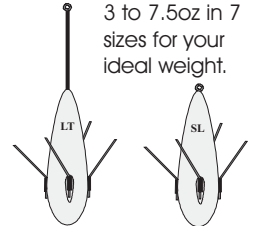

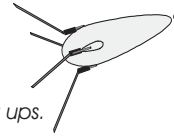

Conversion on sinker weights

- SL/LT 90gm =3oz
- SL/LT 110gm =4oz
- SL/LT 130gm =4.5oz
- SL/LT 150gm =5.3oz
- SL/LT 170gm =6oz
- SL/LT 190gm =7oz
- SL/LT 210gm =7.5oz

The long tail will hold better and takes Lead Lift.
The short tail will cast slightly further.

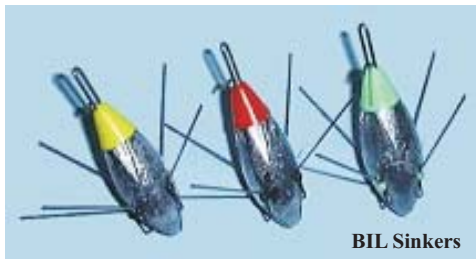

Unbreakable beads.
Adjustable tension wires.
Aerodynamically shaped
for longer distance.

On retrieval the wires rotate. Less hang ups.

3 to 7.5oz in 7
sizes for your
ideal weight.

BREAKAWAY SINKERS HOLD BETTER AND ALLOW YOU TO FISH LIGHTER

BIL Sinkers

Breakaway Impact Sinkers

You take a great sinker and then you put an impact shield in it. This is evolution Just watch this bad boy fly and hold. With stainless steel retractable wires or without.

- Sizes available
- BIL 150 gram = 5.35oz
 - BIL/PL 170 gram = 6.07oz
 - BIL/PL 200 gram = 7.14oz

PL Sinkers

BA7

Breakaway Lead Adapter BA7

Imagine this ! Increase your holding power by 40% with no increase in weight. Fits most sinkers. "What a product" Its featherweight that holds like a heavyweight champ All plastic, stainless steel wires and unbreakable beads.

New Softy Sinker

The New Breakaway Softy Sinker is designed to hold large baits in strong tides. This sinker will stay where the fish are. The holding wires are soft and will bend allowing the lead to be easily retrieved. Same Great Aerodynamic shape and built in Impact Shield.

- SS170 170 gram = 6.07oz
- SS200 200 gram = 7.14oz

SS Sinkers

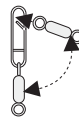

Breakaway Fastlinks & Spinlinks

Features: Change sinkers, lures or rigs in a second. No Knots. Stainless Steel, No Moving Parts, The Terminal ends of wire are within the link. Weedless operation. Great for anyone who has problems opening normal clips. 10 Links per pack

- FL 1 FastLink 80#
- SL 2 Spinlink 60#

The only thing that can't open this link is a fish.

Twin Links

Twin Links for quick attachment of rigs and sinkers. A proven and safe link to use. Neat, quick stainless steel clips.

TL 1

Breakaway Quick Fix Booms

Just wrap the line 3 times around the open end of the clip, close the plastic slider and you have a non slip stand off boom in seconds. Quickly attach your snoods, no knots or line damage.

Quick Fix Boom QF 1

You know how good they are.

They protect your bait and increase your distance. The only clip down that protects your bait on impact. Build your own clip down rigs.

Package of 4 w/Shrink Tube **IS1**

Breakaway Lead Lift

"Don't hang up, hook up" **NL1**

2 Lead Lifts and 2 stainless steel clips and bars per pack. The Lead Lift will fit any sinker with an eye. Vastly reduces terminal tackle loss and line wear. The Lead Lift will lift any sinker to the surface to reduce risk of snagging and speed retrieval.

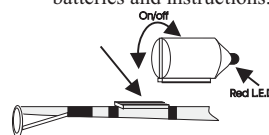

A must for any tackle box

OLD RED EYE

Comes with rod mount, batteries and instructions.

RTL1

Replaceable batteries. A lifetime of use. Leave on rod during cast.

Breakaway

There are four different styles of our clip down rigs. All our rigs are designed so they will set the hook automatically at long distances

Any rig with PRIG in the product code is a Pulley Rig. The leader to the sinker feeds through the eye of the swivel that attaches to the main fishing line. This rig allows considerable movement before the fish will feel the hook set.

Attach Sinker To Clip
Place baited hook on impact shield in front of leader
Attach to Main Fishing Line

Any rig with LRFF in the product code is a Long Range Fish Finder. The fish finder element is: The trap bead for the hook leader is placed lower on the sinker leader to allow movement when the fish takes the bait.

Attach to main fishing line
Place hook on clip
Attach sinker to clip
Place baited hook on impact shield in front of leader

Any rig with FOR in the product code is a Far Out Rig. The rig has a trapped hook leader. This is a better design for bottom feeding fish. The rig keeps the bait nearer the bottom.

Attach to main fishing line
Place hook on clip
Attach sinker to clip
Place baited hook on impact shield in front of leader

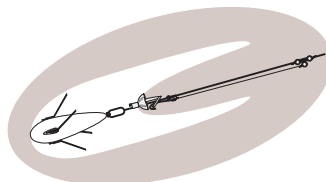

Breakaway offers several NEW Double Drop Rigs (Any Rig with DC in the product code) for specialized applications. These new rigs provide double clip down using a lower Impact Shield and center Cascade Clip. Adjustable Davis Crimps are provided so you can clip down the hook or the hook loop. You get that famous Breakaway Long Distance Cast in a double drop rig!

Attach to Main Fishing Line
Davis Crimp
Attach Baited Upper Hook or Hook Loop To Cascade Clip
Cascade Clip
Impact Shield
Attach Sinker To Clip
Attach Baited Lower Hook or Hoop Loop To Impact Shield

**Aerodynamic Shielding
Means Less Drag
Greater Distance!**

**On impact with water shield
will protect and then release
baited hook**

Breakaway Copolymer line is low diameter and has high resistance to abrasion. The fisherman can now fish with the same amount of line on his spool using 20lb as he had 12lb. The line guard and UV protector will make this line a winner. The guards come on all 1/4lb spools. The guard will prevent line wastage on partly used spools. The casting ability of this line is the best. Compare our diameters.

The Breakaway Cannon is an instant success.

We launched this great new product on our web site.

It has become an instant success.

This casting aid for the fisherman using a spinning reel is the quickest way for someone to improve his or her accuracy and distance. Totally eliminates damage to the index finger during the cast.

Just tape the cannon to the butt of the rod; in a comfortable position above or behind the spool rim, allowing space for the bale arm to rotate.

The Breakaway Boat Pier Rest is a great way to protect your rod against impact damage. Just stretch the rubber and lock it in place. Great for piers, boat rails, etc. By using two of these on a vehicle roof rack you have a great way to transport your rods to and from your favorite fishing hole.

Boat Pier Rest **BP1**

Ceramic Bearings and Reel Mag Conversion Kits
Breakaway USA carries the NEW ceramic replacement bearings for most popular conventional reels along with full Mag control conversions kits for most popular ABU reels. For information see the price sheet, For availability, and delivery, go to <http://breakawayusa.com> or call 361-949-8083

Breakaway Thumb Button TB1
Still proving faithful service for over 25 years. Although it has now been surpassed by the Cannon it still offers a cheap way for the person using spinning reels to protect themselves from line damage to the index finger whilst casting. Just tape it to the rod.

Breakaway Coasters are the most versatile on the market and have so many uses that I would not leave home without them, The picture shows how they attach the reel to the rod. One size fits all rods.

Black Coaster Clips **NC1**

This is it. If you want to get championship performance then this is the quickest way to do it Clean your bearings with a degreaser, let the bearing dry and apply one or two drops only. The performance difference is instantly noticed. Whether bass fishing, tournament casting or fish for the big boys in the surf. A performance tuned reel will produce results. (Longer smoother casts.) The oil comes in three grades. Red for the normal fishing, Yellow will get you a bit speed and Tournament will blow your mind. The oil is extremely thin yet will hold to the bearing. Many of the current long cast records have been won using Rocket Fuel

RFG= Rocket Fuel Grease RFR= RED RFY= Yellow RFT= Tournament

Breakaway rods by have proven themselves on the tournament field and also as the best fishing rods manufactured for the USA fisherman who fishes from his feet. The longest casting rods manufactured in the USA

LDF Stands for Long Distance Fishing and is the copyright of Breakaway
The S. or C. in the model number stands for spinning or casting.

The above blanks and rods are manufactured using High Strain Graphite's
All rods have a zoned action in them to allow for longer casting of baits or lures.

Warning: When using these rods it is recommended to use a shock leader.

Shock leader rule: Go around the reel 5 to 8 times, then to the tip of the rod and down to the butt of the rod.

Take lure or sinker weight in ounces times 10 and convert to lb. This is the line weight of the shock leader. (2oz lure x 10 = 20lb shock leader.)
